

A person is sitting inside a tent, looking out at a vast mountain landscape at sunrise. The sun is low on the horizon, casting a warm, golden glow over the scene. The landscape features rolling hills, a winding path, and distant mountain peaks. The person's legs and feet are visible in the foreground, wearing dark pants and brown shoes. The tent's interior is visible on the left and right sides of the frame.

PERFECT EYESIGHT  
ISN'T JUST SHARP.

IT'S ALSO CLEAR,  
WIDE AND FAST.

ocusweep™

There's more to vision than meets the eye

---

THROUGH THE OCUSWEEP EXPERIENCE, PEOPLE LEARN HOW THEIR VISION ACTUALLY WORKS IN EVERYDAY SITUATIONS – WHEN READING, AT WORK, DRIVING, IN SPORTS. OCUSWEEP MAY EVEN DETECT AN UNNOTICED PROBLEM – AND ENABLE EARLY TREATMENT.

---

#### OCUSWEEP – PLATFORM FOR VISION HEALTH

Ocusweep measures vision performance – the prime function of the whole visual system. Good sight capability is not just about precision. It's also about clarity and the width of the visual field, including our ability to distinguish shades of lightness and focus our eyes as well as take action based on our perceptions. We are moving from vision examination to testing how we actually see. Understanding vision performance is not only exciting but very useful as well. Problems in vision performance may indicate a hidden eye disease which can then be treated.

#### VISION FITNESS TEST AIDED BY TAILORED TEST PACKAGES

With Ocusweep, testing vision performance can be done with one device and test session. Depending on the customer's needs, the test choice can be made between vision health, driving, working and sports vision. The results of these inspiring tests are saved in the Ocusweep Cloud Service. The customer receives a comprehensive and easy-to-read report. Thanks to the cloud service, retesting and comparison of results are reliable and convenient.

#### OCUSWEEP CHANGES THE WAY WE SEE OUR VISION

Ocusweep makes comprehensive understanding of vision performance available to everybody. Using Ocusweep does not require special conditions – it adjusts to ambient light. A new era for vision testing has begun.

#### OCUSWEEP IMPROVES YOUR BUSINESS

Individually designed and pleasant test experience improves customer retention. Ocusweep service platform brings additional sales to optical retailers. More information can be found at [ocusweep.com](https://www.ocusweep.com).

## TESTS

### VISUAL ACUITY

Distance vision and near vision, the ability to distinguish details.

### CONTRAST VISION

Measures clarity of vision. Weak contrast vision causes fogginess and weakens the possibility to recognize objects in bad weather or darkness.

### VISUAL FIELD

Measures visual field integrity, width and height. The brain compensates for defects in the visual field, so it's difficult for a person to discover specific defects without a test. A defect can be caused by an eye disease, which can then be treated.

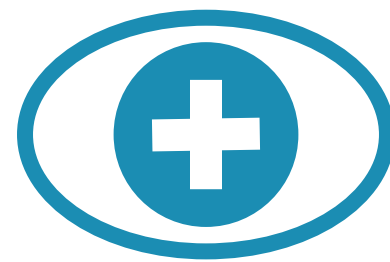

### REACTION TIME FIELD

Measures perception speed and reactions throughout the whole visual field.

### COMING SOON: REACTION TIME

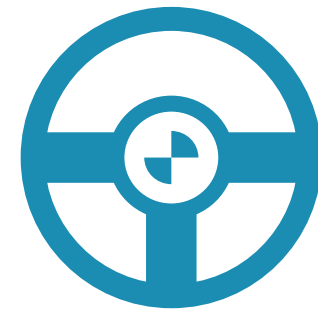

Vision-based reaction time reveals the speed of collaboration between your eyes and brain. Significantly slower reaction time weakens your vision performance.

## OCUSWEEP TESTS

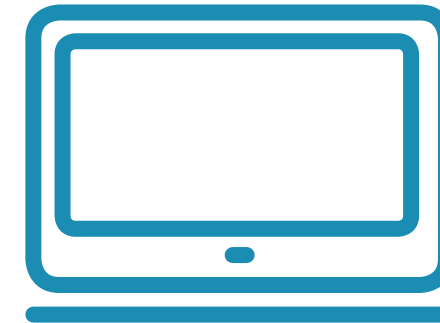

### VISION HEALTH

Distance vision, near vision, contrast vision, visual field and reaction time. A comprehensive examination of vision performance, which gives the customer a thorough understanding of their vision fitness.

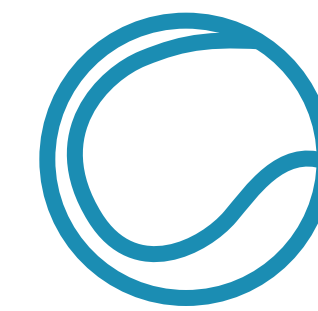

### DRIVING VISION

Distance vision, contrast vision, visual field and reaction time. The test verifies customer's vision performance when driving a car.

### WORKING VISION

Distance vision, near vision, contrast vision, visual field and reaction time. Customers can find out how they see at work.

### SPORTS VISION

Distance vision, contrast vision, visual field, reaction time, reaction time field.
